Interface Homme Machine Python-Tkinter Travaux Pratiques N° 2

Objetcif:

- > Réaliser une interface graphique contenant les widgets standards .
- Les widgets à utiliser en plus de ceux déjà vus en TP01 sont :
 - ✓ CheckButton (Case à cocher)
 - ✓ Radiobutton(Bouton radio)
 - ✓ ScrolledText (TextArea)
- ➤ Utiliser le module messagebox qui contient des classes et fonctions pour afficher les boîtes de dialogue

L'interface graphique de l'application doit avoir le format ci-dessous.

```
Code complet source de l'application
from tkinter import *
from tkinter import ttk
from tkinter import font
from functools import partial
from tkinter import scrolledtext
from tkinter import messagebox
root.title("Widgets Standards d'un formulaire : Suite(2)")
